Slavi Dimitrov

Fullstack Software Engineer

Software engineer with a strong frontend foundation and growing backend expertise in Django. Comfortable in environments where the problem shapes the stack, and where solving something well means learning a new tool mid-project rather than forcing an old one to fit. Experience spans startup MVPs to production platforms – building interfaces in React and Vue, automating workflows with n8n, and increasingly owning backend systems with Django and PostgreSQL.

Experience

Aug 2025 - Present
Waracle

Fullstack Engineer

- Deliver end-to-end product features across the stack for platforms in the education sector.
- Own UX implementation from design handoff through to shipped, production-ready features.

Sep 2024 - Aug 2025
EI Concept

Junior Frontend Engineer

- Maintained and extended existing systems, developing new user experiences across Transport and Financing domains.
- Worked cross-functionally to translate product requirements into functional frontend interfaces.

Education

Sep 2026 – Jun 2030
University of Plovdiv "Paisii Hilendarski"

Bachelor of Engineering
Computer Software Engineering

Deepening fundamentals of software engineering and computer science theory alongside professional experience.

Mar 2023 - May 2024
Software University (Softuni)

Python Fullstack Developer

- Intensive fullstack program covering Python, Django, SQL/PostgreSQL, JavaScript, and React – the foundation of my current stack.

Skills

Languages	JavaScript, TypeScript, Python
Frontend	React, Vue, HTML, CSS, Sass, Tailwind, MUI
State & Data	Zustand, TanStack Query (React Query), React Router
Backend	Django, Django REST Framework, Node.js, Express, Celery
Databases	PostgreSQL, Supabase, Redis
Automation & Integration	n8n, Klaviyo
Infrastructure	Docker, n8n, Klaviyo Git, Vite, Netlify, Vercel
